About Us

The Company Universal Civil Craft Pvt. Ltd. under the leadership of Structural Engineer Mr. Ganesh J. Kadav, B.Tech. The company was formed in the year 1995 in the name and style as Ganesh J. Kadav. When we look back in the past years we have been given opportunities to carry out number of Civil Construction works like Factories, Oil Storage tanks, Water Storage tanks, R.C.C. Column & Beam frame compound walls, Cullet yard and Residential Bungalows and Buildings through leading architects. Today the construction department of the company is led by experienced and qualified Engineers and Managers as a result our creations show a definite class above the rest. The company has world class infrastructure to execute the construction works.

More so because behind the engineers is a fleet of other efficient departments dealing with all other aspects of Constructions like Purchase, Accounts, Planning, QC and Overall Management. We are always working hard to shape the clients dreams to reality and the achievement of our goals.

Vision

Leading by the philosophy of pursuing excellence, Supreme Group envisions being an innovative player in infrastructure development in India today; with the hunger to grow and the attitude to compete globally tomorrow.

Mission

- To develop strengths and be amongst the leading construction and contracting company in India
- To provide end to end Construction Solutions
- To increase presence across various Infrastructure sectors
- To be the most preferred contractor
- To proliferate and become a global player

Safety Policy

- Stipulating clearly defined safety objectives
- Establishing safety requirements corresponding to these objectives.
- Assigning work of specialists and professional engineers who fully understand the safety consequences of the designs.
- Specifying what reviews, risk analysis and audits are to be carried out by the project team, safety officer or others to determine whether the design and construction meet the stated objectives.
- A Site Safety Plan appropriate to the size of the project and the perceived risks is made to ensure that the construction activities are undertaken in a safe manner.

Quality Policy

Universal Civil Craft Pvt. Ltd. is determinedly committed to its quality policy of excellence in construction with extreme care to quality. It is our responsibility to dedicate our energies to achieve the following objectives in the field of all fields of operation.

- To deliver products and services in the most excellent & most efficient approach to achieve total customer satisfaction.
- Procurement of material of the highest quality is one of the biggest priorities.
- All projects and services undertaken by Universal Civil Craft Pvt. Ltd. will be implemented in such a manner that it will meet the customer satisfaction and comply with applicable statutory requirements.
- The quality of end product shall be improved upon by the continuous advancement in the field of research and engineering.
- A healthy, environmental friendly & friendly & safe atmosphere shall prevail at work sites at all times.

Our works

As turnkey civil contractors, we do total civil work for industrial Mega projects. Apart from planning, designing and construction of the main factory building, we also take up all allied works like land development, compound wall, office building, concrete roads, water tank, landscaping and general beautification of the site.

Earthwork

Equipped with high performance machinery and backed by quality workmanship, we execute earthwork projects of any scale and complexity.

Infrastructure

An emerging player in the Infrastructure sector, we are proud of our ability to match international standards in planning, design, execution, health & safety and eco-safe development.

Land Development

We have the end-to-end capability to systematically develop the given land and make it fit for residential, commercial or industrial projects. Our scope of work includes soil sampling, site planning, government permits, subdivision, draining, dredging, excavating, filling, grading, paving, construction of access roads, landscaping, installation of sewers and utilities such as water and electricity.

- AJE India Pvt. Ltd.
- Coinseco, Talaja MIDC
- Kores (I) Ltd.,
- Asmeeta, Texpo, Bhiwandi
- Lupin Ltd.
- MIDC Projects

Company Philosophy

*"In the business world,
everyone is paid in two coins:
Cash and Experience.
Take the Experience first,
The cash will come later"*

Environmental conservation is virtually the flavour of the season. Human intervention with nature has mounted to such an extent over the last few decades that today the progressively degrading environment has started posing a threat not only to the Planet Earth but also to the wellbeing, even survival of the human race. Waking up to the serious threat, sustainable living has become a catchword that has prompted humanity to balance its progress with preservation of the surroundings that it sustains itself in. Aware that every economic activity impinges on the natural world, humanity today has become more conscious of the need to conserve the environment. Green construction or building green buildings is a manifestation of this evolving consciousness.

Green Engineering

Construction by the very nature of the activities it involves makes use of natural resources. Primitive man had simple and limited needs. His abode therefore had very little impact on his environment. With the civilizational evolution human needs have escalated and greater sophistication in construction has hugely impacted on nature. The growing urbanisation, especially in the developing world, is going to tap not only more and more natural resources, it also is going to impact the environment more and more around the urban areas.
